Terms of Use

Bibliographic Citation: Publications based on ICPSR data collections should acknowledge those sources by means of bibliographic citations. To ensure that such source attributions are captured for social science bibliographic utilities, citations must appear in footnotes or in the reference section of publications. The bibliographic citation for this data collection is:

International Social Survey Program (ISSP). INTERNATIONAL SOCIAL SURVEY PROGRAM: FAMILY AND CHANGING GENDER ROLES III, 2002 [Computer file]. ICPSR version. Cologne, Germany: Zentralarchiv fur Empirische Sozialforschung [producer], 2004. Cologne, Germany: Zentralarchiv fur Empirische Sozialforschung/Ann Arbor, MI: Inter-university Consortium for Political and Social Research [distributors], 2004.

Request for Information on Use of ICPSR Resources: To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about ICPSR participants' research activities, users of ICPSR data are requested to send to ICPSR bibliographic citations for each completed manuscript or thesis abstract. Visit the ICPSR Web site for more information on submitting citations.

Data Disclaimer: The original collector of the data, ICPSR, and the relevant funding agency bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

Responsible Use Statement: In preparing data for public release, ICPSR performs a number of procedures to ensure that the identity of research subjects cannot be disclosed. Any intentional identification or disclosure of a person or establishment violates the assurances of confidentiality given to the providers of the information. Therefore, users of data obtained from the ICPSR archive and/or any of its special topic archives agree:

- To use these datasets solely for statistical analysis and reporting of aggregated information, and not for investigation of specific individuals or organizations, except when identification is authorized in writing by ICPSR
- To make no use of the identity of any person or establishment discovered inadvertently, and to advise ICPSR of any such discovery
- To produce no links among ICPSR datasets or among ICPSR data and other datasets that could identify individuals or organizations

Redistribution: ICPSR data may not be redistributed or sold to other individuals, institutions, or organizations without the written agreement of ICPSR.

Bibliographic Description

ICPSR Study No.: 4106

Title: International Social Survey Program: Family and Changing Gender Roles III, 2002

Principal Investigator(s): International Social Survey Program (ISSP)

Series: International Social Survey Program Series

Bibliographic Citation: International Social Survey Program (ISSP). INTERNATIONAL SOCIAL SURVEY PROGRAM: FAMILY AND CHANGING GENDER ROLES III, 2002 [Computer file]. ICPSR version. Cologne, Germany: Zentralarchiv fur Empirische Sozialforschung [producer], 2004. Cologne, Germany: Zentralarchiv fur Empirische Sozialforschung/Ann Arbor, MI: Inter-university Consortium for Political and Social Research [distributors], 2004.

Scope of Study

Summary: The International Social Survey Program (ISSP) is an ongoing program of cross-national collaboration. Formed in 1983, the ISSP group develops topical modules dealing with important areas of social science as supplements to regular national surveys. This data collection is the third survey exploring the topic of family and changing gender roles (please see INTERNATIONAL SOCIAL SURVEY PROGRAM: FAMILY AND CHANGING SEX ROLES I, 1988 [ICPSR 9591] and INTERNATIONAL SOCIAL SURVEY PROGRAM: FAMILY AND CHANGING GENDER ROLES II, 1994 [ICPSR 6914] for the earlier data concerning the same topic). Participating countries in the 2002 survey included Austria, Australia, Brazil, Bulgaria, Chile, Cyprus, Czech Republic, Denmark, Finland, Flanders (Belgium), France, Germany (West and East), Great Britain, Hungary, Ireland, Israel, Japan, Latvia, Mexico, Netherlands, New Zealand, Northern Ireland, Norway, Philippines, Poland, Portugal, Russia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Taiwan, and the United States. Respondents were queried on various topics regarding the family, relationships with spouse or other partner(s), marriage, divorce, child rearing, single parenting, changing gender roles in the home and workplace, fulfilling family responsibilities, division of housework, management of household income, working parents (particularly working mothers), job-related stress, and job satisfaction. Demographic variables include sex, age, ethnicity or nationality, marital status, level of education, current employment status, family income, number of people living in household, household composition, religious denomination, trade union membership, political party affiliation, and region of the country and size of community where currently residing.

Subject Terms: attitudes, child care, child rearing, divorce, domestic responsibilities, dual career families, families, family life, family structure, gender, gender roles, housework, marriage, public opinion, working mothers, working women

Geographic Coverage: Austria, Australia, Belgium, Brazil, Bulgaria, Chile, Cyprus, Czech Republic, Denmark, Finland, France, Germany, Great Britain, Hungary, Ireland, Israel, Japan, Latvia, Mexico, Netherlands, New Zealand, Northern Ireland, Norway, Philippines, Poland, Portugal, Russia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Taiwan, United States

Time Period: 2000

Date of Collection: September 2001-February 2004 (some date variations by country)

Universe: Persons aged 18 years and older living in the countries Australia, Bulgaria, Brazil, Chile, Cyprus, Czech Republic, Denmark, France, Germany (West and East), Great Britain, Hungary, Ireland, Israel, Latvia, Mexico, New Zealand, Northern Ireland, Philippines, Poland, Portugal, Russia, Slovakia, Slovenia, Spain, Taiwan, and the United States with the exceptions of Finland (ages 15-75), Switzerland (ages 15 and older), Austria, Japan, and Netherlands (ages 16 and older), Norway and Sweden (ages 18-80), and Flanders (ages 18-85).

Data Type: survey data

Data Collection Notes: (1) The variable locations and lengths indicated in the codebook do not correspond to the variable locations and lengths indicated in the SAS and SPSS data definition statements, which directly correspond to the ASCII data file. Users should consult the data definition statements for variable locations and lengths that match the ASCII data file. (2) A weight variable is provided for use in analyzing data for the following countries: Austria, Bulgaria, Chile, Czech Republic, Finland, France, Great Britain, Hungary, Ireland, Northern Ireland, Philippines, Poland, Portugal, Russia, and Switzerland. Please see study descriptions for these countries for additional information on weighting procedures. (3) All country-specific frequency distributions in the codebook documentation are calculated from unweighted data. (4) Some value codes may have country-specific meanings. Moreover, the date of collection, source of data, sampling design and weighting procedures varied by country. Users should consult the country-specific study descriptions in the codebook for further information regarding each. (5) Users are also strongly encouraged to visit the Web site for the International Social Survey Program at <http://www.issp.org/> for additional information about this data series. (6) The codebook and data collection instruments are provided by the data producer as a Portable Document Format (PDF) file. The PDF file format was developed by Adobe Systems Incorporated and can be accessed using PDF reader software, such as the Adobe Acrobat Reader.

Information on how to obtain a copy of the Acrobat Reader is provided on the ICPSR Web site.

Methodology

Sample: The sampling frame varied by country. Variations of the following sampling techniques were used: simple random sampling, systematic random sampling, (two- or multi-stage) clustered or area probability random sampling, and (two- or multi-stage) stratified random sampling.

Data Source: personal interviews, self-enumerated questionnaires, and mail-back questionnaires

Extent of Processing: DDEF.ICPSR/ FREQ.PR/ MDATA.PR/ REFORM.DATA/
REFORM.DOC

Access and Availability

Extent of Collection: 1 data file + machine-readable documentation (PDF) + SAS data definition statements + SPSS data definition statements + data collection instruments

Restrictions: These data were supplied by the Zentralarchiv fur Empirische Sozialforschung in Cologne, Germany. To provide funding agencies with essential information about the use of archival resources, and to facilitate the exchange of information about research activities based on the Zentralarchiv's holdings, each user is expected to send two copies of each completed manuscript to the Zentralarchiv. All manuscripts utilizing data made available through the Zentralarchiv should acknowledge that fact.

Data Format: Logical Record Length with SAS and SPSS data definition statements, and SPSS portable file
