Source: CQ Press using data from U.S. Dept of Health and Human Services, National Institute on Alcohol Abuse and Alcoholism "Volume Beverage and Ethanol Consumption for States" (<http://www.niaaa.nih.gov/Resources/>)

\*This is apparent consumption of actual alcohol, not entire volume of an alcoholic beverage (for example, wine is roughly 11% absolute alcohol content). Apparent consumption is based on several sources which together approximate sales but do not actually measure consumption. Accordingly, figures for some states may be skewed by purchases by nonresidents.
