“The SAGE Reference Online database is highly recommended for academic and public libraries. With its intuitive interface that promotes the exploration of exceptional content, SAGE Reference Online is an excellent choice for increasing access to reference content.”

—The Charleston Advisor

“The design is elegant and simple…This product is wholeheartedly recommended for public, academic, school, and special libraries supporting research in the social sciences from high school level onward.”

—Cheryl LaGuardia, Library Journal

“Will librarians and users hold the electronic version in the same high regard as the print collection? Yes, most definitely, given the content’s quality and the smooth interface. This user-friendly database presented none of the glitches that can accompany the initial use of a new product…This excellent reference resource includes a brief tutorial.”

—L. Lord, University of Kansas, CHOICE

SAGE Research Methods Online—
the essential tool for researchers from the world’s leading research methods publisher – Coming in 2010!

An expert research tool

SAGE Research Methods Online (SRMO) includes an expertly designed taxonomy for social science research methods employing both visual and hierarchical search tools to help researchers and students as they browse and discover material and link through to related methods and information about key authors in the field.

A wealth of essential content

SRMO provides the most comprehensive picture available today of research methods across the social and behavioral sciences. Quantitative, qualitative and mixed methods researchers and students can quickly identify and understand the exact method that will facilitate the highest quality, methodologically sound research.

SRMO contains more than 100,000 pages of SAGE book and reference material on research methods as well as editorially selected material from SAGE journals. More than 500 books will be available online through SRMO, including the complete Quantitative Applications in the Social Sciences “Little Green Books” series from SAGE.

Easy-to-use navigation tools

With content clearly organized by discipline, topic and philosophy, it’s easy to find the answers to your most pressing research methods questions.

Content organized by complexity

New to research or an experienced researcher? You’ll find the right content to support your research, from basic definitions and practical guidance for using methods to detailed case studies and theoretical discussions.

• Methods Map
  SRMO allows you to create a visual search “map” from the taxonomy that links methods or authors. The Methods Map has a save/download/print feature and a bread crumb trail beneath it to easily return to a previous place in the search.

• Methods Collections
  List the articles and chapters that you have found most useful and explore other users’ lists using the Methods Collections—and share your collections with colleagues and students.

• Multimedia
  SRMO includes video interviews with some of the leading authors in the field—perfect for introductory information and classroom use.

• Cite, print, and download content with ease
  SRMO makes it easy for you to cite, print, download and share links.

• About the author
  Find out more about the leading authors in your area of research and discover more about a particular author’s articles and books. There is also an option to see connected “key thinkers/authors” in the visual search tool.

• Regularly updated content and features
  New books and articles, as well as new features, will be added each year to keep you current with the latest developments.

• Must-have content
  SRMO provides you access to more than 100,000 pages of book, journal and reference content covering almost 2,000 qualitative, quantitative, and mixed methods topics and terms from the world’s leading publisher of research methods.

Librarian friendly features include:

• COUNTER Compliant Usage Statistics
• MARC Records
• OpenURL Compliance
• DOIs for book chapters registered with CrossRef

SAGE is committed to ongoing, incremental enhancements to SAGE Journals Online, our award-winning online journals platform. Now, after much consultation with end-users, librarians and our society partners, we are undertaking a major upgrade of the SAGE Journals Online platform to a new environment supported by HighWire’s “2.0” technology (nicknamed “H2O”). All 560+ SAGE journals will be available on the next generation of our platform by the end of 2010.

The new user interface is a flexible three-column design that makes features available without taking attention away from the substantive article content. Features most closely associated with the manuscript pages are placed closest to it. A major goal of the new design is to keep readers in context as they conduct research.

Visit http://online.sagepub.com for more information.

The following new features and functionality will be added to the next generation of SAGE Journals Online:

- Journal and society branding – home page designs will include greater prominence of journal titles and association logos, names and links to society sites.
- Browse, advanced search and alerting features – expanded discipline functionality across 40+ categories
- Abstract preview – mouse-over entries available from tables of contents and search results provide instant pop-up previews of abstracts, without leaving the page.
- Tag-along navigation – content feature options follow alongside as you scroll down the article page.
- Feature hideaway – author affiliations, related links, and other optional functions can be expanded or hidden from view; these preferences are retained throughout a session.
- Popular-articles list – Most-Viewed and Most-Cited articles lists are readily available from all pages within a journal site.
- A more agile, robust content architecture, hosted in industry-standard, NLM metadata format
- Redesigned SJO portal – provides targeted options and improved navigation for all types of users.
